

Spring 2026

## 1. Examples of damper applications

### 1. Soft-close lid for medical waste bins.

**An example of the adopted model : FPD series, Compact Rotary Damper, etc.**

Our FPD-1018 series are used for lids of medical waste bins (Medical Pails). The foot-operated lid closes slowly when the foot is released.

### 2. Absorbing shocks from drone landing gear.

**An example of the adopted model : FPD series, Compact Rotary Damper, etc.**

Shock absorbers and helical isolators can be installed to reduce shocks on the landing gear when drones land.

### 3. Silenced Toilet Paper Holder Rotation

**An example of the adopted model : Compact Rotary Damper, etc.**

The damper reduces the noise generated when the toilet paper holder rotates to dispense the paper. Recommended for bathrooms near bedrooms or other noise-sensitive environments.

### 4. Noise reduction by slowing down the opening and closing of floodgates : FYT-

**An example of the adopted model : LA3/FYN-LA3 series, etc.**

Dampers are installed on the hinges of floodgates to reduce noise generated when opening and closing.

### 5. Shock absorption for moving parts of high-end headphones.

**An example of the adopted model : FPD series, Compact Rotary Damper, etc.**

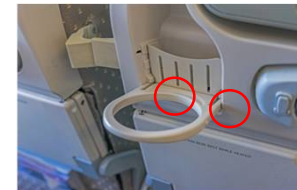

FPD series are used for the headband sliders, which are the moving part of headphones, and Compact Rotary Dampers are used for the moving parts of the ear cups.

### 6. Slow-down folding cup holders installed on the underside of train or automobile seats.

**An example of the adopted model : FPD series, Compact Rotary Damper, etc.**

The slow-down effect created when folding cup holders installed on the underside of train seats creates a luxurious feel.

- ⓘ The above models are only examples and may vary depending on the weight of the lid, installation position, and other factors. Even if a linear plastic damper (FPD) is used, other dampers (Rotary Damper or Vane Damper) may also fit. Please note that our products may not be compatible even for the same application.

## 2. Fuji Latex Group has established its Human Rights Policy.

The Fuji Latex Group respects the human rights and dignity of all people and conducts its business activities in accordance with international human rights standards. This policy applies to all of our officers and employees, and we ask for the understanding and cooperation of all our business partners.

The details are as follows: [https://www.fujilatex.co.jp/en/company/human\\_rights\\_policy/](https://www.fujilatex.co.jp/en/company/human_rights_policy/)

## 3. Online training for our products

• Fuji Latex Co., Ltd. offers online training on our products to our distributors at any time.

Our expert staff will provide easy-to-understand explanations of product features, selection methods, and the latest use cases. If you would like to attend training, please feel free to contact our sales staffs. We look forward to receiving your applications.
